Re: Magna Metals site sampling results
510-534 Furnace Dock Road
Cortlandt, New York

Dear Mr. DeAlto:

As per my prior email, the New York State Department of Environmental Conservation (NYSDEC) conducted an additional round of soil sampling at the 510-534 Furnace Dock Road property. The samples were collected in the vicinity of and downgradient from the former Magna Metal building. The results of these analyses were provided by the NYSDEC and are attached for your information. Baker is currently reviewing these results.

As always, please feel free to call me at (914) 461-9344 if you should have any questions on this matter.

Very truly yours,
Baker Capital Limited Partnership
